Cosmetic Surgeon Declares Bella Hadid the World's Most Beautiful Woman

Take it all with a grain of salt but cosmetic surgeon **Dr. Julian De Silva** used computer mapping techniques and ancient Greek math to name **Bella Hadid** the most beautiful woman on earth.

According to *Harper's Bazaar*, De Silva measured faces of several superstars for the Greek Golden Ratio of Beauty Phi. Out of these women, Bella Hadid topped his list with her facial features being 94.35% accurate for

the "golden ratio." Per De Silva's computers, Hadid's eyes, eyebrows, nose, lips, chin, jaw, and facial shape are the most ideal dimensions for beauty.

"Bella Hadid was the clear winner when all elements of the face were measured for physical perfection," **De Silva said**. "She had the highest overall reading for her chin which, with a score of 99.7 percent, is only 0.3 percent away from being the perfect shape. Bella also came second behind Scarlett Johansson for the positioning of her eyes."

Coming behind Hadid was **Beyoncé**. According to De Silva, the singer "ran her a close second, scoring the highest marks for the shape of her face (99.6 percent) and getting very high scores for her eyes, brow area, and lips." Beyoncé was followed by **Amber Heard** while **Ariana Grande** came in fourth and **Taylor Swift** was fifth.

"These brand new computer mapping techniques allow us to solve some of the mysteries of what it is that makes someone physically beautiful," De Silva said
