Cinema: Amber Heard, the militant glamor

Amber Heard prints her magnetic presence in *Her Smell*, an indie film with a 100% female cast on a damaged rock star. She tells us about her career and her struggles.

Amber Heard exudes a real aura of star, Hollywood golden age. In this suite of a luxury hotel on the Croisette, where we met her last May, during the Cannes Film Festival, at least five people are busy around her and making sure she does not miss anything. Is it his physique with perfect proportions? (She is the actress with the most beautiful face in the world, according to a study conducted in 2016 by Dr. Julian De Silva, based on scholarly calculations around the number Pi.) His divorce on the background of domestic violence with [Johnny Depp](#)? More likely a real confidence in it that has allowed him to navigate the Hollywood landscape for now a good ten years. It does not matter to him not to be among the most popular actresses.
