## *PATTINSON JUDGED MOST HANDSOME MAN IN THE WORLD*

---

Robert Pattinson has been declared the most handsome man in the world, according to science. London-based cosmetic surgeon Dr. Julian De Silva places the Twilight actor ahead of Henry Cavill, Bradley Cooper, Brad Pitt, and last year's winner George Clooney, using the Golden Ratio of Beauty Phi. The ratio is a measure of physical perfection, adapted from the "golden ratio" artists and architects used

during the European Renaissance to map out their works. De Silva told Britain's Daily Mail newspaper: "Robert Pattinson was the clear winner when all elements of the face were measured for physical perfection." Pattinson was found to be 92.15 per cent "accurate". The 33-year-old's eyes, eyebrows, nose, lips, chin, jaw and facial shape were measured against other male stars. **WENN**
